

Lullaby

DESIGNED BY MONICA FÖRSTER

LIGHT
YEARS

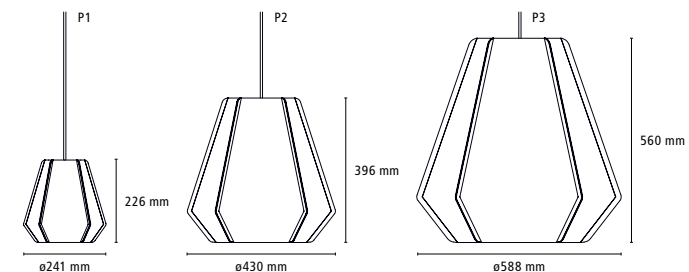

The Lullaby pendants by Monica Förster is a series of pendant lights in sustainable materials that exude opalescence, lightness and grace. Lullaby is made from stone paper with ash lamellae. The stone paper is fashioned into pentagonal, yet slightly organic-looking shapes using five slender ash lamellae. The ash gives the soft stone paper stability as well as both shape and character.

The shade's depth and sharp, inward tuck ensure that the light from the pendant doesn't dazzle. Stone paper is made from crushed limestone and has outstanding luminous qualities. Lullaby emits a soft, muted light that communicates a cosy atmosphere to the room.

FACTS

MATERIAL

Stone paper, ash

PRODUCT NAME	PRODUCT NO.	DESCRIPTION	LIGHT SOURCE
LULLABY P1 Pendant	34301005	Ø241 mm, stone paper and ash lamellae	E27 max 46W
LULLABY P2 Pendant	34301105	Ø430 mm, stone paper and ash lamellae	E27 max 100W
LULLABY P3 Pendant	34301205	Ø588 mm, stone paper and ash lamellae	E27 max 100W
